

My Reflections

#1 and 2 are not optional. Pick one from the remaining (Total of 3)
Innovativeness

1) When I close my eyes, the first thing I think about being Innovative is . . .

When I close my eyes, the first thing I think about being Innovative is likely to be something new and useful. It could be a physical product, a service, a process, or even an idea.

2) Opportunities:

a) Describe an opportunity that you or someone else had to be innovative, or missed an opportunity to be innovative.

I participated in a national level robotics competition. We had 3 students in our team and one of our professor as our mentor. We were trying to fit a gripper(or grabber) (to pick up the objects) our drone(we were creating the drone based aerial robots), then I came up with the idea to use a landing gear as a gripper. We successfully implemented that and now there is **a possibility of a patent** for that custom gripper on our name. I got this idea from an ice-cream scoop:)

b) How do you plan to change your own behavior in the future because of this?

I gained more confidence towards my ideas.

3) I used my Innovativeness to help me to . . .

4) Think of the most innovative person you know or have read about. A technique that person uses to stay imaginative and creative is . . .

COMPETITIVENESS
MINDSET
INSTITUTE

My Reflections

#1 and 2 are not optional. Pick one from the remaining (Total of 3)

Innovativeness

5) I believe I am Innovative because I . . .

6) The hardest thing about Innovativeness is . . .

COMPETITIVENESS
